

FAMILY PLANNING ANNUAL REPORT (FPAR) 2.0 DATA ELEMENTS

The Family Planning Annual Report (FPAR) 2.0 is the next iteration of FPAR data reporting that will collect encounter-level data for Title X family planning agencies. FPAR 2.0 will allow for improved data collection, reporting, and analysis that will ultimately allow for more opportunities to improve service delivery. The current method of aggregate level FPAR 1.0 data reporting will end December 31, 2022. Local agencies will start collecting encounter-level data January 1, 2023, and it will be reported to the Office of Population Affairs (OPA) for the first time in February 2024.

Currently, local agencies are already reporting encounter-level data to the state through the Local Health Department-Health Service Analysis (LHD-HSA) system. We use this data combined with self-report data from each agency to complete the FPAR 1.0. For FPAR 2.0, we will only be using LHD-HSA data for reporting. Once in place, this process will streamline local agency reporting processes and eliminate extra steps.

Below is a table with all the required data elements for FPAR 2.0, as well as a diagram showing the flow of data. Most of these elements are already part of clinic visits, captured in your Electronic Health Records (EHRs) and being reported to LHD-HSA. The items highlighted are either new questions or have been slightly revised.

FAMILY PLANNING ANNUAL REPORT (FPAR) 2.0 DATA ELEMENTS

 Indicates new or revised data element

Data Element #	FPAR 2.0 Data Element	Data Element #	FPAR 2.0 Data Element	Data Element #	FPAR 2.0 Data Element
1	Facility Identifier	15	Pregnancy Status	29	Pap test performed at this visit
2	Attending physician NPI Provider	16	Pregnancy Intention	30	Pap smear test result
3	Provider Role	17	Contraceptive method at intake reported – at intake	31	HPV test performed at this visit
4	Patient Identifier	18	Reason for no contraceptive method use Reported – at intake	32	HPV test result
5	Visit Date	19	Contraceptive method at exit reported – at exit	33	Chlamydia test performed at this visit
6	Birth Date	20	Reason for no contraceptive method use reported – at exit	34	Chlamydia test result
7	Sex	21	How contraceptive method was provided	35	Gonorrhea test performed at this visit
8	Limited English Proficiency	22	Contraceptive counseling was provided	36	Gonorrhea test result
9	Ethnicity	23	Counseling to achieve pregnancy was provided	37	HIV test performed at this visit
10	Race	24	Systolic blood pressure	38	HIV test result
11	Annual Household Income	25	Diastolic blood pressure	39	Syphilis test performed at this visit
12	Household size [#]	26	Body Height	40	Syphilis test result
13	Payer for visit	27	Body Weight	41	Do you want to talk about contraception or pregnancy prevention during your visit today
14	Gender Identity	28	Tobacco Smoking Status	42	Sexual Orientation
